

Fleet Maintenance

The Fleet Maintenance Division ensures the safety and reliability of City vehicles and equipment by providing the highest level of professional and comprehensive service while upholding the superior standards of our profession.

Responsibilities include:

- Repair and maintenance of vehicles & equipment
- Manage and coordinate repairs on vehicles involved in traffic accidents & vandalism
- Coordinate tire repair for field service vehicles and normal replacement due to wear.

Fleet Inventory

The Fleet Maintenance Division maintains a fleet of approximately 136 units ranging from automobiles and trucks to off-road construction equipment, with countless pieces of small and heavy equipment. Our fleet ranges in size from zero-turn mowers to a large sewer vactor truck (vacuum truck), and everything in between including pickup trucks, police cars, tractors, loaders, and dump trucks.

Additionally, we are responsible for the acquisition and disposal of all city vehicles and equipment, development of specifications before purchase, procurement of gasoline and diesel fuel, and the submission of requisitions for procurement of parts.
